Optimal Audio

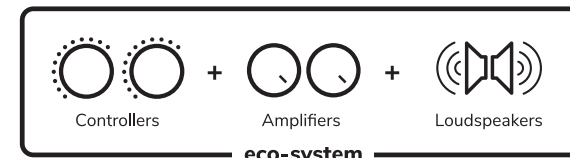

Modern retail environments are design-conscious spaces, where creating the right atmosphere for the clientele is key.

This high-end fashion outlet requires dynamic and punchy sound with consistent coverage across the shop floors, with control from the office via a ZonePad 4. This is in an old building with minimal space behind the ceiling.

The coverage consistency is assured with the wide dispersion Up 4S loudspeakers, which also suit the mounting restrictions. Low frequency performance is enhanced using Sub 10 loudspeakers at floor level.

Using the SmartAmp 30's on-board loudspeaker processing frees up two outputs from the Zone 4 to provide coverage to staff areas.

 U40 Up 40  
  U4S Up 4S  
  S10 Sub 10  
  ZP4 ZonePad 4
