Application

Optimal Audio

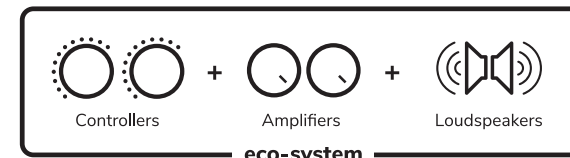

For the smaller independent retailer, budget is always a serious consideration, but an unobtrusive, smooth sounding system that creates the right atmosphere is still important.

A Zone 4P gives all that is needed in a single package that can be operated directly from the front panel, with the Zone4P sitting on a shelf under the counter.

The wide dispersion and wide frequency range of Up 4 loudspeakers are the ideal solution here, with loudspeakers included in the staff and stock rooms for staff communication and relaxation.
